

**Ideation Phase**  
**Define the Problem Statements**

Date	19 <sup>th</sup> September 2022
Team ID	PNT2022TMID03188
Project Name	Inventory Management System for Retailers
Maximum Marks	4 Marks

**Customer Problem Statement Template:**

The main Objective of this Project is to provide a desktop based application that allows retailers to monitor all Inventory related information, including stock management, sales data and purchase information. The application allows the retailers to manage their products flexibility and have complete insight into what is stored in their inventory, and request additional stock as and when needed.

<b>I am</b>	Retailers
<b>I'm trying to</b>	Get more insights on stocks and their availability to increase productivity and reduce overspending
<b>But</b>	Manual management of the stocks are difficult and existing systems aren't much flexible
<b>Because</b>	Too many stock items cause bigger problems and current systems are obsolete
<b>Which makes me</b>	Want to create better inventory management system and increase the accuracy and flexibility for the vendors
